ViTrox Drew A Conclusion With Satisfaction in Nepcon Vietnam & Productronica India 2016

Oct 6-8, 2016, ViTrox co-exhibited with its strategic partner, Kyoritsu (Vietnam) Co., Ltd. at Nepcon Vietnam, 2016. This event took place at SECC in Ho Chi Minh City. We grabbed this golden opportunity to exhibit and demonstrate our best-selling product - V510 Optimus 3D AOI to the visitors. Although it's the first time we showcase our product in Vietnam, but we successfully attracted numerous number of visitors to pay a visit to our booth during the 3-days show.

Besides Nepcon Vietnam, ViTrox also co-exhibited at Productronica India 2016 from 21st to 23rd September at Bangalore International Exhibition Centre. With the co-operation with its strategic channel partners Kyoritsu and iNetest, V510i 3D AOI and V510i G2S AOI systems are showcased to the visitors in India.

Do Chipmakers Benefitted?

Semiconductor Players Benefit From Development of Smart Devices?

The increasing demand for innovative technology products by consumers have pushed the production of smart devices. Besides smartphones, market observers believed catalysts for the growth of the semiconductor industry include the development of smart devices and electronic components for the healthcare and automotive industries.

ViTrox firmly believes that the demand for automation and machine vision inspection systems in semiconductor and electronics assembly manufacturing sectors will grow further due to the miniaturization of electronics products and rapid changes in the consumer electronics and gadget.
