

Your Electronics Communication Solution Provider

ViTroX's **V510i Optimus 3D AOI** is combining camera technology with state-of-art phase shift profilometry's (PSP) projector to provide an effective platform with high-speed 12 Mpixel CoaxPress camera, precise telecentric lens and projectors promise shorter image acquisition, faster transfer interface and larger FOV to address the specific inspection requirement of any production environment without sacrificing performance or speed. Thereby, inspection speed has improved nearly by 200% compared to previous technology.

## AFA Technologies' Visitation to ViTroX

It is our greatest pleasure to host the AFA customers visitation at ViE headquarter. The **V-ONE** team and ViE sales team had specially organized a presentation and exclusive plant tour to the customers.

Chip sales for automotive systems and the internet of things (IoT) will grow 70 percent faster than total IC revenues between 2016 and 2021, IC sales for automobiles and other vehicles are forecast to grow from \$22.9 billion in 2016 to \$42.9 billion in 2021, while revenues for IoT functionality will grow from \$18.4 billion in 2016 to \$34.2 billion in 2021.

The electronics content in vehicles continue to rise thanks in part to new technologies and advanced functionality particularly for safety systems. For IoT continues to grow, this translates into a growing need for all types of electronic components from capacitors, resistors and inductors to sensors, controllers and memory devices that target IoT system applications.
