

Your Electronics Communication Solution Provider

Integration of ViCAT and V-ONE

You may have known our approach in delivering the prominent Industry Internet of Things (IIoT). But, do you know that our software-based solutions can connect with each other to achieve more than what you need?

Industry 4.0, or also known as The Fourth Industrial Revolution, is an industry trend that involves accessions such as cyber-physical systems, the Internet of things, cloud computing, and cognitive computing.

ViCAT, an Ethernet-based fieldbus system produced by ViE Technologies is useful in providing a wide range and cost-effective standalone IO solutions to the users. It integrates with V-ONE, the digital dashboard and AI analytics for smart manufacturing produced by ViTrox Technologies. This customizable open-platform offers data-driven decisions in the manufacturing process by allowing stakeholders to remote, visualize, monitor, control and implement condition-based alerts with the ticketing feature to reduce downtime and increase throughput.

Hence, both solutions from ViE and ViTrox integrate with each other to fulfill the capacities of the Industrial Internet of Things (IIoT) in this fast-growing market.

SME Digital Tech 4.0 Conference

ViE and ViTrox joint SME Digital Tech 4.0 Conference, a program for vigorous business leaders in developing digital transformation into business, on 17th April (8am to 5pm) at Top Happiness Grand Ballroom, Mines 2, Kuala Lumpur. In response to the theme of “Kick-Start Your Digital Transformation”, ViE showcased its Ethernet-based Fieldbus system and Standalone IO solution, ViCAT, while ViTrox displayed V-ONE, the latest Industry 4.0 smart solutions to the visitors. Both aimed to educate visitors on the importance of acquiring IIoT solutions in their smart manufacturing journey. As a result, we’ve received an overwhelming response throughout the event.
