# Announcement!

The Latest ViMO  
Is Coming Out Soon

## ViMO: What's New In This Upcoming Version?

You may have known that our ViMO, or motion card in specific, is a simple yet cost-effective stepper motor controller and driver solutions for a variety of industrial motion applications. It is usually built as a high-performance 2-axis Digital Signal Processor (DSP) based stepper driver intended to drive 2-phase and 4-phase hybrid stepper motors.

Typically, we generate 2-axis DSP for users, but do you know that instead of dual-axis, our upcoming ViMO version is in single axis mode?

There's so much to talk about their core features, such as its software-configurable system, smoothing features, motor tuning for various applications, direction input logic level and flexibility, and motion oscilloscope (ViMO-Scope). Most importantly, the latest ViMO is thinner in height and possesses firmware upgrading capability for higher performance improvement.

We expect to launch the latest series in October 2019. Stay tuned for more!

Your feedback is important to help us improving our service

## Electronics Manufacturing Expo (EMAX) Asia 2019

Once again, thank you for dropping by our booth in EMAX 2019, an exhibition for the Electronics Manufacturing and Assembly Technology and Equipment industry, held from 17th to 19th July 2019 (10am-6pm) at SPICE Arena Penang, Malaysia.

Apart from **V-ONE**, ViTroX highly customizable open platform, you have seen the latest product manufactured by ViE during the exhibition. **ViCAT IO** is a wide range and cost-effective standalone IO solution for various industries that offer IIoT solutions which align with the trend of Industry 4.0.

We thank you for showing your interest in these latest industrial 4.0 solutions. Your encouragement and feedback are invaluable in helping us to enhance our products and services in the long term. See you again next year!
