

Your Electronics Communication Solution Provider

REDESIGNED ViCAT IO Consist of Overloading Protection.

* ViCAT iD5724-76

Our ViCAT IO is known as the Ethernet-based Fieldbus system that provides a wide range and cost-effective standalone IO solutions to the users. By its integration with V-ONE, the digital dashboard and AI analytics for smart manufacturing produced by ViTrox Technologies, both fulfill the stringent needs of the Industrial Internet of Things (IIoT) in this fast-growing market.

Named after **iD5724-76**, the latest ViCAT solution possesses configurable 20 digital channel input and configurable four digital channel output with a 5V/12V power sourcing that consists of overloading protection. Unlike the previous models, iD5724-76 was built with more concrete specifications with full-fledged content in each aspect, such as output specification, input specification, and general specification.

If interested, you may click the link below for more insights of ViCAT iD5724-76 and contact us for assistance if necessary. We will always be excited to serve you to the best!
