Start to Connect with ViE Through LinkedIn!

PENANG MALAYSIA – June, 2017 – [ViE Technologies](http://www.vie.com.my), is a 100% owned subsidiary of ViTrox Corporation Berhad. ViE produces variety of Electronics Communication Solutions (ECS) for machine automation mainly used in data communication and motion control. Today, ViE announces that its LinkedIn Page is officially launched on 19th June 2017. ViE's LinkedIn Page shares about its core business, brand activities, products & services and also job opportunities.

Nowadays, people start to use LinkedIn as a platform to explore for business opportunity and ViE would also like to ride on the wave of this trend. LinkedIn serves as a channel for 2-way communication whereby customers or potential leads can easily look for ViE through LinkedIn, vice versa. Moreover, ViE would also like to tap on this platform to reach the global market and wider audience.

Through LinkedIn, you can read about the latest ViE information like New Product Launching, updates about company/product, newsletter/announcement, training/company event/company activities which had been held or even recruitment news. Besides, ViE will share the latest market information, semiconductor manufacturing related articles or some other useful information through its LinkedIn Page.

As social media is the latest platform for communication between company and customers, ViE will not left behind from others. Hence, let's connect with ViE's LinkedIn Page to explore more about ViE!
