Driving Semiconductor Innovation: Edelteq's Positive Experience with ViE Technologies

Incorporated in 2004, Edelteq is a leading semiconductor manufacturing solutions provider, offering a wide range of products and services for the semiconductor industry. Specializing in engineering support for semiconductor equipment and materials used in IC assembly and test processes, Edelteq has built a strong reputation for delivering innovative and reliable solutions.

Edelteq has expressed high satisfaction with ViE Technologies' VINET I/O solutions and lighting controllers. According to an Edelteq engineer, ViE's I/O cards are exceptionally easy to implement, facilitating a seamless integration process with minimal disruption. The competitive pricing of the I/O solutions adds further value, making them a cost-effective choice for automation needs.

A standout feature is ViE's LSC-G2 lighting controller, which enables software-based control of multiple light channels, significantly reducing inspection times and boosting operational efficiency.

Edelteq also complimented ViE Technologies for their short lead times and excellent technical support. ViE team is recognized for being highly responsive, attentive, and committed to addressing customer needs. With a seamless blend of user-friendliness, reliability, competitive pricing across its product portfolio, and outstanding customer service, Edelteq confidently

recommends ViE Technologies' I/O solutions and lighting controllers to businesses seeking dependable and efficient automation solutions.
