Sophic Automation Testimony: Smooth Integration of VisionXpert Smart Code Reader with Outstanding Service and Support from ViE Technologies and NSCB

Sophic Automation has successfully integrated the VisionXpert XS-90 Smart Code Reader with outstanding service and support from ViE Technologies and great collaboration with our trusted sales channel partner, NSCB System. From initial consultation to on-site implementation, ViE's professionalism and technical expertise were evident at every step. The ViE team worked closely with Sophic to provide expert guidance, answer all inquiries promptly and minimise any potential downtime. This level of service made the integration process both seamless and effective.

The integration also marks a significant milestone as Sophic moves toward greater automation and efficiency. The XS-90 is a user-friendly smart code reader designed to automate code scanning, streamline operations and increase overall productivity. Its high-speed scanning capabilities and advanced features have greatly improved operational efficiency, delivering precise and reliable code reading performance in a fast-paced manufacturing environment.

Smart Code Reader (XS-90) Key benefits:

- High-speed, automated scanning for streamlined production
- Simple integration with existing systems
- Reliable performance in challenging manufacturing conditions

"We've experienced significant improvements in efficiency since incorporating the XS-90 into our production line," said Management at Sophic Automation. "The support we received throughout the integration process was outstanding and made a significant difference in how smoothly everything was implemented."
